4.4 milion

people benefit from improved access to drinking water

258 million

euros in commitments over 10 years

974,000

people accessing a sustainable sanitation service

Tanzania has embarked on an ambitious Water Sector Development Program (WSDP) for the period 2006-2025.

To meet its objectives, AFD operates according to 3 strategic lines of action:

- access to water and sanitation in urban areas
- protection of the resource
- capacity building in the sector

#WorldInCommon

Our financing 2009 – 2019:

1

Participation in the multi-donor fund in support of the National Water Sector Development Program (WSDP)

- Sovereign loan of €40 million over 20 years
- Including €4 million dedicated to capacity building for the Ministry of Water and for Sanitation Services
- Impacts:
 - ✓ 3,3 million people will benefit from improved access to drinking water.
 - ✓ 525,000 people will benefit from improved access to sanitation services.

2

Water and Sanitation Improvement Project for Lake Victoria surrounding towns

- 3 successive sovereign loans of €115 million in total
- Partnership approach: additional co-financing of €45 million in sovereign loan from the EIB and €1.5 million in a grant from the EU
- Development of collective and autonomous sanitation systems in the cities of Mwanza, Bukoba, and Musoma
- Improving access to drinking water in Mwanza and 3 surrounding towns (Misungwi, Magu and Lamadi)
- Monitoring and control of Lake Victoria water quality
- Technical assistance: capacity building of 3 water boards
- Impacts:
 - ✓ 400,000 people will have access to improved Water supply and Sanitation.
 - ✓ In Musoma, 162,000 people already benefited from improved access to water
 - ✓ In Bukoba, the area of water distribution network was expanded to cover 88% of the residents, against 75% previously.

3

Morogoro Municipality Water and Sewerage Services Improvement Project

- Sovereign loan of €70 million over 20 years
- Securing water resources: development and implementation of a water resource management master plan
- Improving and expanding the Municipal water and waste water system
- Technical assistance: capacity building for the water authority
- Impacts:
 - ✓ 250,000 people will benefit from improved quality and better access to drinking water.
 - ✓ 40,000 people will benefit from access to improved sanitation.

Financing in progress:

- Improving access to water and sanitation in Shinyanga
- Sanitation and water loss management in the southern districts of Dar es Salaam
