

LNGO NATIONAL WASH SUPPORT STRATEGY

An integrated participatory approach by local non-governmental organization supporting the Lebanese authorities to provide water services in unserved high-tension neighbourhoods

- **Formalizing the successful WASH interventions by local NGOs vulnerable, high tension areas in Lebanon**
- **Contribute to MoEW's National Water Strategy in areas with a need for additional social interventions**
- **Support Regional Water Establishments to provide high quality WASH services and gain subscriptions..**

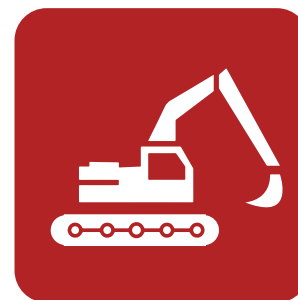

LNWSS MECHANISM (7-STEPS)

TOR / MAPPING

SOCIAL COMPONENT

PARTICIPATORY APPROACH
(technical component)

ADVOCACY

WATER SAFETY
PLAN

SUBSCRIPTIONS

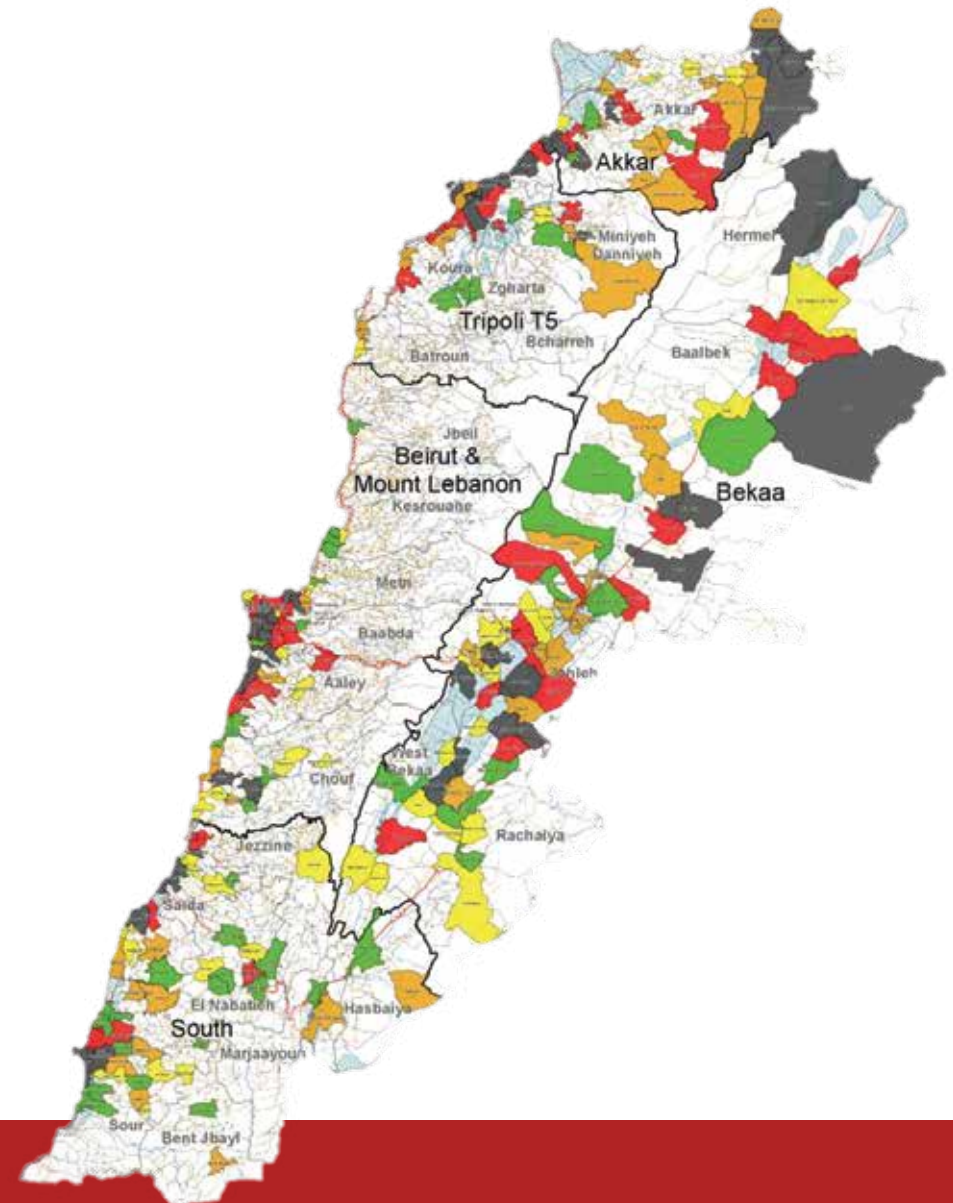

HAND OVER

RWE ADOPTION OF THE PROJECT

Stakeholders identification

ToR signature from stakeholders
acknowledging the project's:

- objectives
- impact
- consequences

MAIN DISCUSSION FOR TODAY BY END OF PRESENTATION.

**STRENGTHENING THE CITIZENSHIP, SENSE OWNERSHIP, AND WILLINGNESS
TO PAY FOR PUBLIC SERVICES CORE COMPONENTS INTERVENTIONS
(NOT LIMITED TO):**

**COMMUNITY
COMMITTEE**

**PUBLIC SERVICE AND
CONSERVATION
AWARENESS**

**INTRODUCTION
OF ROLE MODELS**

LNWSS 3 | PARTICIPATORY APPROACH (technical implementation)

THE LINGO CONTRIBUTES TO THE CONSTRUCTION PROCESS BY:

Community
Communication
Plan

Vocational
Training/CfW
Programme
Management

building
the capacity
of the
committees

Ensuring
High Quality
Standards
of Project

Combating
False Rumours
reg. the Project

System

LNWSS 4 | ADVOCACY

bottom approach (customer relation)

DONORS/GOVERNMENTAL PARTNERS SUPPORT IN ADVOCATING TO:

Pro-Poor
Financial Instruments

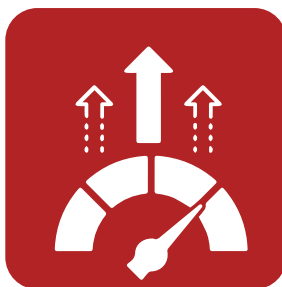

Proper
Water Metering

Historical Penalties

Control & communicate
water quality

Improving
Collection Rate

Participatory
Construction

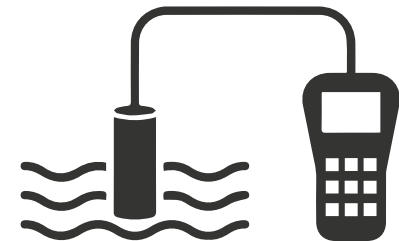

MoEW and Regional Water Establishments review quality water at source level
LNGOs sample the water quality from the tap backwards

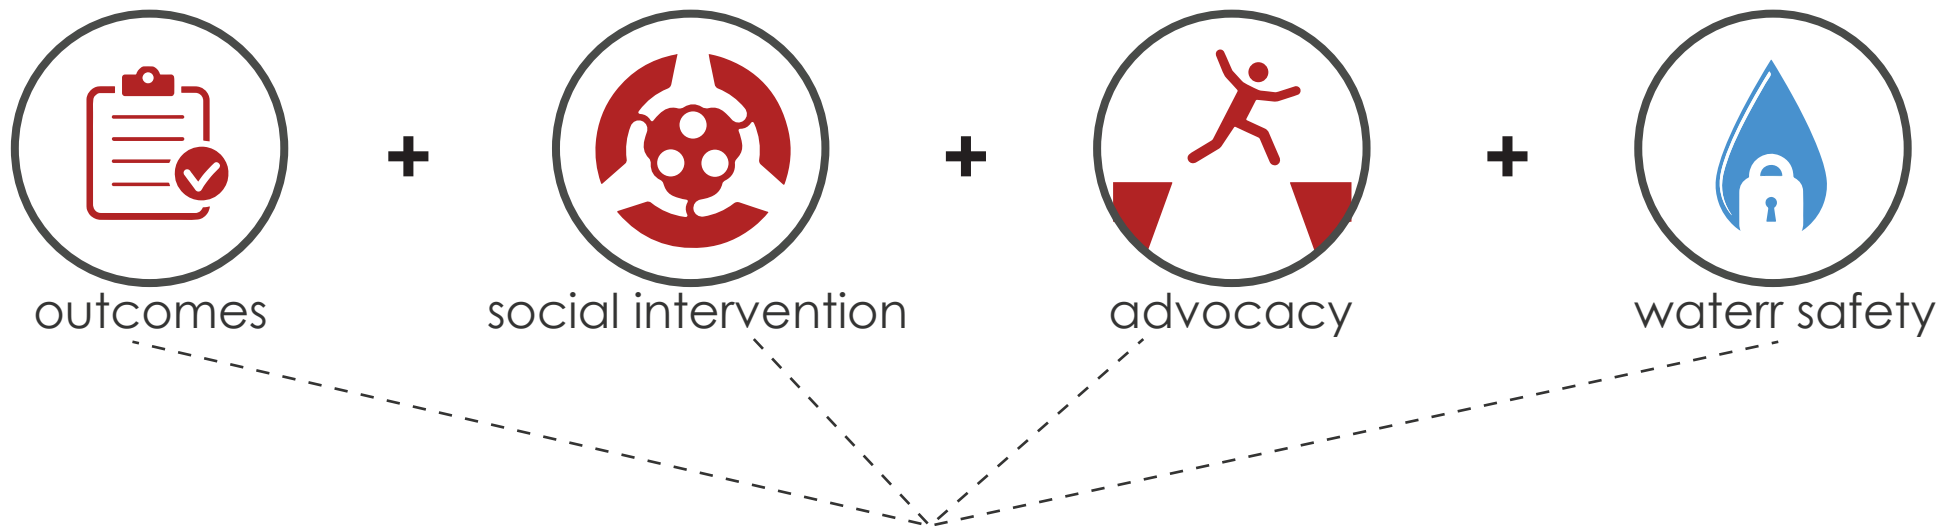

**Identify the areas of
contamination for strategic
restoration**

**Provide neutral proof of
water quality to the
authorities and public**

**Control and Communicate
water quality**

Combining the outcomes of the social intervention, challenges and the water safety plan to positively influence the subscription rate by increasing the willingness to pay for the provided public water sources, improve the population's attitude to water conservation and maintaining the infrastructure

3 MAPPING EXERCISES:

UNSERVED AREAS

VULNERABILITY

TENSION & CONFLICT

The final phase is a result of the previous phases where the relationship and trust between the local community, local NGO and the authorities has been developed. This structure (community, civil society and local authorities) then can be engaged by other stakeholders to support in tackling non-WASH-related problems in the area.
