

Monitoring a water goal within the future Sustainable Agenda of the United Nations - post 2015

*Modalités de suivi d'un objectif Eau dans le futur agenda du développement durable
des Nations unies – post 2015*

16.04.2015 / 11:30 - 13:00 PM

COMMITTED TO WATER FOR THE WORLD

ENGAGÉS POUR L'EAU DU MONDE

In September 2015, the United Nations General Assembly will adopt the future sustainable goals. These goals are a continuation of the millennium goals. They have nevertheless the specificity of broadening to all countries and fully incorporate the will to go towards a sustainable future. A water goal within these goals is fundamental, and needs to be supported by a strong monitoring system. This workshop session will go over the monitoring tools and orientations proposed in the international field.

Draft agenda

Moderated : Gérard Payen
