END OF OCTOBER

Linking national monitoring systems and local governments

Seminar on monitoring local WASH services

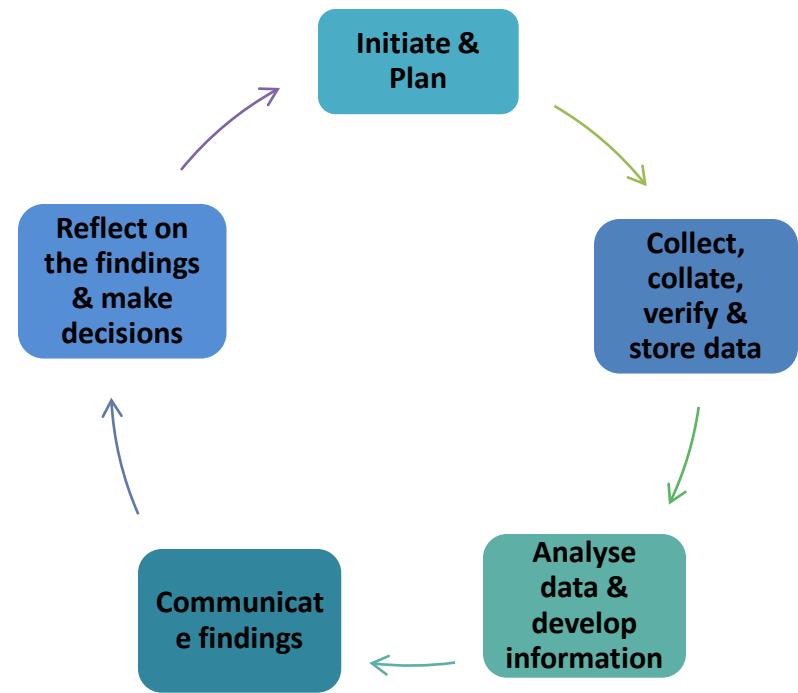

Ouagadougou
April 2014

Julia Boulénouar

Country-led M&E- a cornerstone of sustainable WASH services

National monitoring is key for:

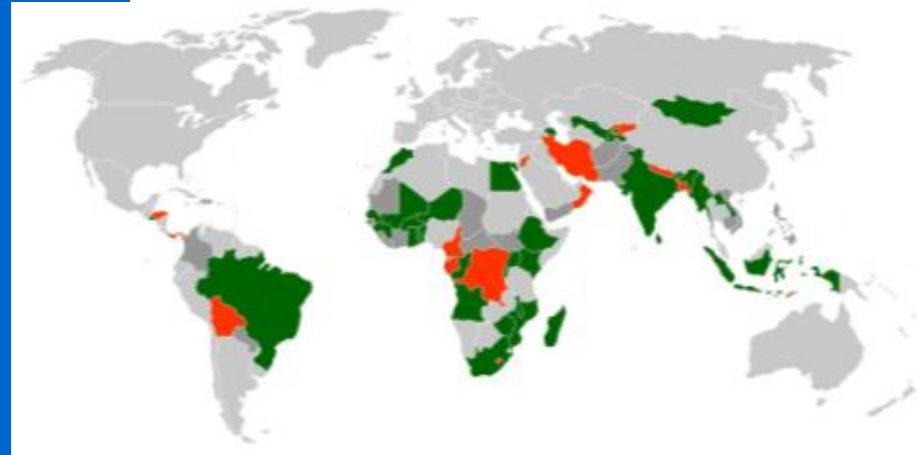

- Decision-making (budgeting, planning)
- Accountability
- Developing norms and standards
- Establishing local framework for M&E

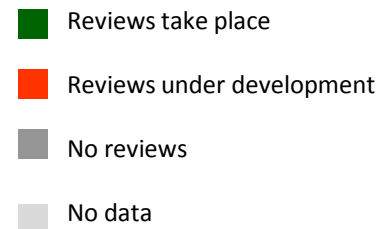

Source: Kerstin Danert, 2013

Comprehensive country-led M&E rarely happens

- M&E is often project-driven
- Has a cost/not a priority
- Existing national M&E is often fragmented, focused on coverage
- Information does not flow to the districts

Source: GLAAS, 2012

Presenters/panellists

Toro Boro

Ingénieur du génie rural, Directeur
de la programmation et du suivi-
évaluation- Direction générale des
ressources en eau- **Burkina Faso**

Patricia Gyamfi

IT specialist
Community Water and
Sanitation Agency
Ghana

Francis Ogunpitan

Institutional and Policy Expert,
Monitoring and Evaluation
Federal Ministry of Water Resources
Nigeria

Synoden Kautsi

Civil engineer
Ministry of Water Development and
Irrigation
Malawi

Areas of discussion

1. How to use the results for planning and budgeting?
 - At national level
 - At Local Government level
2. Are we collecting the right information?
 - Coverage vs. Services
 - Financial data
3. Keep the Local Government angle
 - How to make national monitoring useful for LGs?
